About Me

Motivated blockchain and security enthusiast with three years of industrial experience. Passionate about research or explorative-based development work.

Education

Shahjalal University of Science and Technology

B.Sc in Computer Science and Engineering

CGPA - 3.60/4.0

Sylhet

2017 - 2021

Research Experience

A Survey on Blockchain & Cloud Integration

2020

A concise and complete review of the Blockchain-integrated services in the form of IaaS, PaaS or SaaS in Cloud platform. We categorized these integrations into four primary sections: Security, Blockchain, Federation and Management as a Service. We classified significant works by their scope and assessed each using standardized metrics, feature comparisons, and constraints.

Word Completion and Sequence Prediction in Bangla Language Using Trie and A Hybrid Approach of Sequential LSTM and N-gram

2020

We proposed a hybrid model combining N-grams and bidirectional LSTM for auto-completion and sequence generation model. This demonstrated superior performance in preference-specific word generation and sequence prediction, particularly in prediction-based contexts. Apart from standard Bangla news portal, we compiled a distinctive dataset characterized by its rich vocabulary, drawn from literary sources.

Deep Learning Approach Combining Lightweight CNN Architecture with Transfer Learning: An Automatic Approach for the Detection and Recognition of Bangladeshi Banknotes

2020

To address the limited dataset of banknotes, we mainly focused on the combination of data augmentation techniques, hyperparameter tuning, and optimization methods. Our experiments demonstrated that transfer learning, in conjunction with lightweight models like MobileNet and NASNetMobile, outperformed the heavier ResNet152v2 model, achieving significantly higher accuracy rates.

Work Experience

Therap (BD) Ltd.

Dhaka

Software Engineer II

Jul 2021 - Present

[Therap](#), US-based software company supporting health-specific managerial solutions for individuals, service providers and states.

- Implemented several features for handling patients and (primarily intellectual and developmental disabilities), service providers' data management, and service monetization for billing management, scheduling, quartz based data
- Collaborated with third-party aggregator organizations to send our application data upon their requested approach.
- Actively involved in several R&D projects i.e. Therap Report Lib. (data export, visualization tool), Therap Authentication Service, Integration with IVR [PlumFuse](#)
- Took an active role in several major releases like jQuery, Bootstrap version upgradation.
- Learnt sensitive data management while development, Web Security Scopes, enterprise specific application development process
- **Technical Skills:** Java, Spring, JavaScript, React, Oracle WebLogic Server, Oracle SQL, Ubuntu Linux, Scripting, Git, Docker.
- **Soft Skills:** Teamwork, Leadership, Time management, Collaboration, and Presentation skills.

BRAC HNPP APPLICATION DEVELOPMENT

Brac Center, Dhaka

Developer and Content Designer

Oct 2019 - Nov 2020

A contractual work with [Brac HNPP](#), worth 4.3k USD, for developing a trainee management and learning module currently having 1k plus users.

- Developed a learning and management tool for health workers of the mentioned organization.
- Handled successful application maintenance (comprising 25% of the current user base) for a considerable time.
- Negotiated business and design requirements with the business team and direct-user feedback.
- Communicated with client requirements through several field visits.
- **Technical Skills:** Java, Android, Volley, React and ExpressJS, Git.
- **Soft Skills:** Requirement Negotiation, Team and deadline management.

Virtual Reality (VR) based E-learning application for children with ASD

SUST Research Center, SUST, Sylhet

Research Assistant and Developer

Jul 2019 - Jun 2020

University research center funded our work on the implication of VR-based interactive module feasibility and acceptability for special children.

- Proposed an interactive VR-based module for people (especially children) having Autism Spectrum Disease.
- Navigated existing VR-related approaches and developed a prototype based on our proposition.
- Collected practical user feedback upon the prototypical demonstration and several Autism school visits.
- **Supervisor:** [Md Mahadi Hasan Nahid](#)
- **Technical Skills:** Unity, C#, Android, Git.
- **Soft Skills:** Collaborative work, Problem sorting, Research direction, Presentation skills.

Thesis & Notable Projects

Security-as-a-Service (SaaS): A Three-way Blockchain Based Security Service Delivery Model for Cloud

[Thesis Report](#)

I proposed a three-way blockchain-enabled security service (Access control, Secure Searchable Encryption, and Data provenance) on a cloud platform.

- Implemented blockchain-enabled Secure Searchable Encryption (SSE) on cloud platform.
- Data owners on cloud can have full secured control and shared policies over the files.
- Data owners can customize access policies through the use of smart contracts.
- Experimented with several attack models on our blockchain network for proper judgment and efficiency calculation.
- Study existing blockchain implementation on cloud in all sorts of scopes.
- **Platform:** Hyperledger Fabric, AWS Cloud
- **Supervisor:** [Dr. Md Sadek Ferdous](#) | [Thesis Presentation Link](#)

SHIKHA (Torch - A light to freedom)

[Github Link](#)

A story-based short lengthed Role Playing Game (RPG) based game.

- Player have to pass different obstacles and solve various sorts of riddles.
- I developed all the game environment, objects and sprites myself.
- **Tools:** Unity, C#, Adobe Illustrator, Coral Essentials

SUST ONLINE EXAM

[Github Link](#)

A website to conduct exams and monitor student progress online.

- Manage new course, course material, exam, exam questions-answers and also student performance from teacher's side.
- Join assigned exam from particular teacher and get the result from student's side.
- **Tools:** PHP, Laravel, MySQL

Skills

Languages	C, C++, C#, Java, Python, Php, JavaScript, Solidity
Frameworks and Tools	Hyperledger Fabric, Docker, Android Studio, Unity, Laravel, React, Firebase, Tensorflow
Database	MySQL, MongoDB
Version Control	Git
Miscellaneous	LaTeX, Packet Tracer, MatLab, Adobe Phototshop, Adobe Illustrator

Achievements & Roles

	WINNER (Team Nrick) BRACATHON 3.0
2019	Designed and developed a prototype of a digitalized learning approach for the health workers of BRAC in "Knowledge distribution in last-mile health services" category.
	WINNER (Team Nrick) SUST TechFest
2019	Presented a VR-based learning module for Autism of several age stages. Through this application, we focused on Joint Attention difficulty, a common issue for people with Autism.
	1st RUNNERS-UP (Team Nrick) IUT 10th ICT Fest
2018	Developed a prototype of an AI-based application for patients to solve the problem of seeking the right doctors or emergency help.
	Head of Design ICBSLP 2019
2019	Supervised publication team of International Conference on Bangla Speech and Language Processing 2019.
	Secretary General SUST ACM Student Chapter
2019-2020	Organized several coding events, workshops and especially virtual sessions in the time of COVID lockdown.

Certifications

Coursera: [AWS Fundamentals Specialization](#), [Blockchain Specialization](#), [Google Cloud Platform Fundamentals: Core Infrastructure](#)
